**Office Action Summary** 

U.S. Patent and Trademark Office PTO-326 (Rev. 11/00)

Part of Paper No. \_\_\_\_\_\_\_

Application/Control Number: 09/955,671

Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 1-7, drawn to an apparatus for providing a plurality of perforations in a dough layer prior to baking, classified in class 99, subclass 430.

II. Claims 8 and 9, drawn to a method of creating a plurality of perforations in a dough layer, classified in class 426, subclass 503.

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group I as claimed can be used to practice another and materially different process, e.g., for use in creating a plurality of perforations in the bare spots of lawns for hydrating and seeding purposes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 09/955,671

Art Unit: 1761
